

## Temperature practice

Name: \_\_\_\_\_

Use formulas to convert

1.  $80^{\circ}\text{C}$  is what in Fahrenheit?
2.  $40^{\circ}\text{F}$  is what is Celsius?
3.  $-5^{\circ}\text{C}$  is what is Fahrenheit?
4.  $-56^{\circ}\text{F}$  is what in Celsius?

Remember if we are talking about a change in temperature you use the same formulas but without the "32" part.

5. Temperature increase of  $20^{\circ}\text{C}$  is what in Fahrenheit?
6. Temperature decrease of  $10^{\circ}\text{F}$  is what in Celsius?

Answer bank (not in order)

23	176	-48.89	4.44	5.56	36
