

# PowerPoint Assignment #2

Create a PowerPoint presentation, 8 slides in length about something you have learned in the past year. It could be something you learned in school (Ancient Egyptians, or how to add fractions) or something you learned at home (how to cast a fly rod, how to cook Afritada). You will record the slide show with a spoken narration. You can use the pen tool.

- Each slide other than the first and last should have **no words on it**. Use pictures and animations to show what you mean rather than writing a paragraph.
- The first slide should be a title with pictures and your name
- The last slide should be a source list where you list the URL of every page you got a picture or information from.
- The middle six slides should look very good and contain pictures and animations which contribute to the message of your presentation.
- None of the pictures should have watermarks
