

Portfolios

As you work through this course you will create a portfolio on Fresh Grade which highlights the skills you have learned or improved throughout the course. Each item in your portfolio will be accompanied by a write-up which explains exactly what skills went into creating the product, and how the product demonstrates that you have indeed mastered those skills. Exactly how many items are in your portfolio will depend on what you worked on but it should not contain all of your work. Rather, it should be a selection of the best work which demonstrates the widest breadth of skills you have mastered. Periodically throughout the course your portfolio will be graded. Each grade is to be considered temporary, and will be replaced the next time your portfolio is graded.
